Structure of Applications Received.

1. Introduction

Each year, 600,000,000 people from around the world die due to lack of access and lack of affordability of quality healthcare services. Ninety-nine percent of these deaths occur in low and medium income countries of the world like Nigeria. In addition, Nigeria healthcare system has been ranked 187th out of 191th by World Health Organisation (WHO) healthcare performance index. The overall impact of this situation is that too many people who are in need of urgent and sometimes life-saving are unable to access and afford such medical care.

For a decade, Sakinah Medical Outreach has provided and supported the less privileged with free healthcare services through its 'Save-a-Soul' Project which provides free quality healthcare services to the indigent.

Through the generous donations of Muslim Nigerians, we have been able to touch many lives— Muslims and non-Muslims.

To date, 2213 beneficiaries have received medical care through Sakinah Medical Outreach services.

Between January 2020 and June 2020, the following are the statistics relating to our operations:

Total Number of applications received: 28

Approved Cases – 7

Pending Cases- 21

Status: In Progress

3. Application Process

During application for the Sakinah Medical Outreach 'Save-a-Soul' project, the following process are followed;

- Online Application:

Applicants are encourage to fill forms online, seeking for medical intervention from our website (www.sakianhoutreach.org). This form contains crucial details about the applicants, nature of the sickness, details of next of kin, and consent form. This form allows us to have an overview about the condition of applicants.

- Collation and Submission of Applications:

Forms submitted via website is collated by the administrative office, and submitted to the management for review. The first review is done by the admin officer, to ascertain that the forms were correctly filled before forwarding it for verification.

- Verification:

After collation and submission, the application are reviewed by professional medical doctors to ascertain the validity of any compliant. Telephone calls, video calls and physical examination are also used to verify the originality of applications.

- Approval:

If an application is considered valid, it is approved based on urgency, available funds and the treatment procedure involved.

4. Summary of Applicants

The Sakinah application form for the Save-A-Soul Project is open throughout the year, as such applications are continuously received. Since the beginning of this year (2020), a total of 28 applications have been received and processed. The figures below shows the demographic structure of the applicants. Sadly, the organization is heavily limited in its ambition to touch more lives due to lack of fund.

Figure 1: Map of Nigeria Showing Where Applications Were Received From.

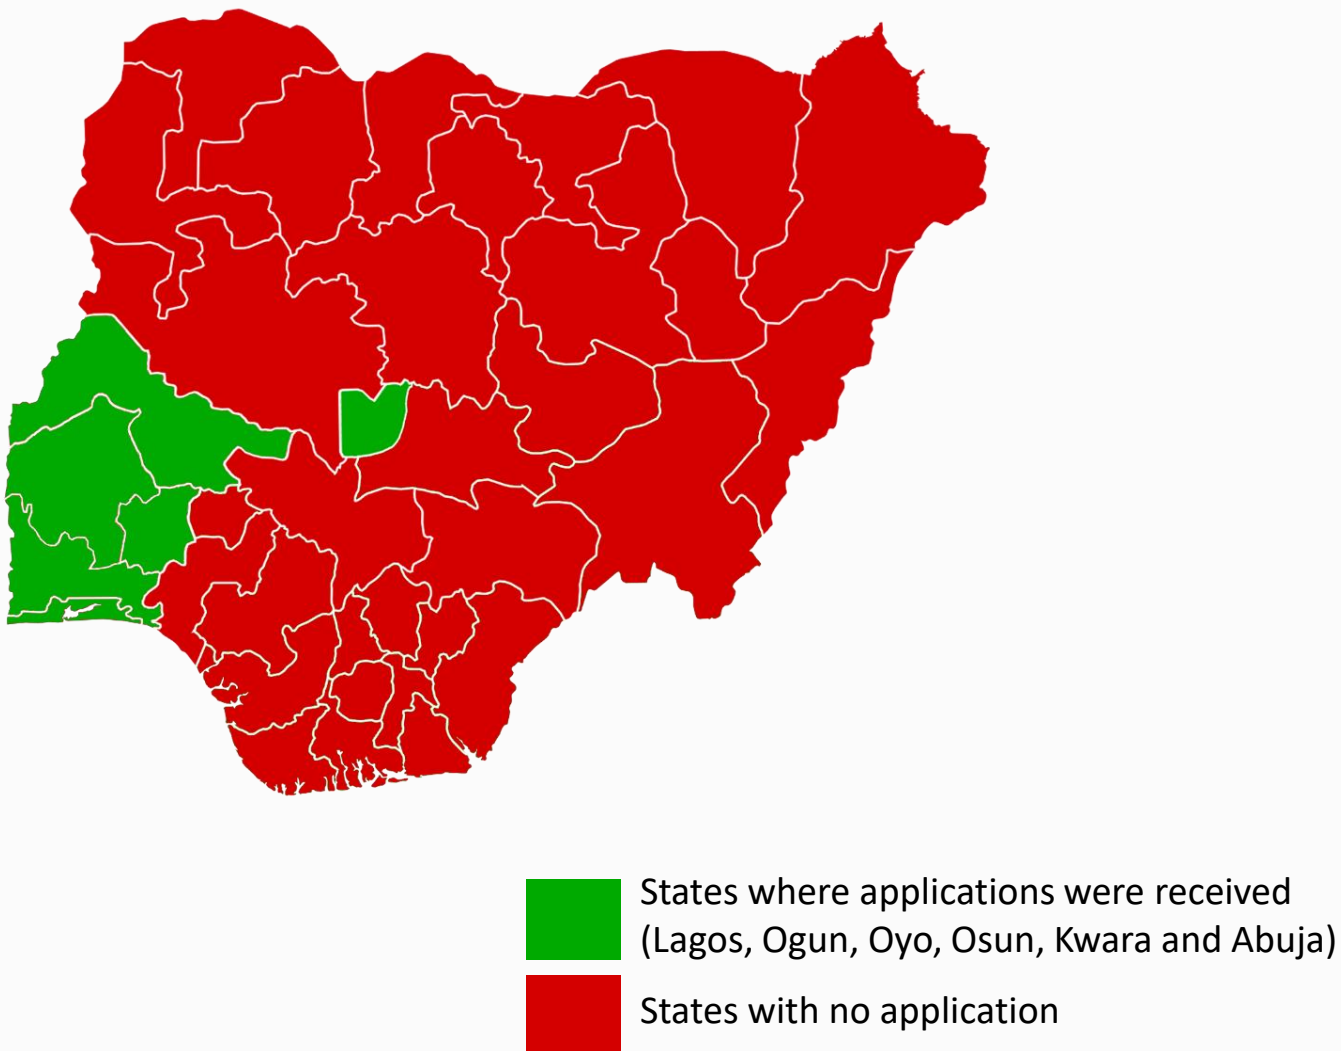

Figure 2: Applications Status

The figure below reveals that 28 applications were received from January 1st, 2020 till date. Since then only 7 applications have been approved (5 cases resolved and 2 ongoing) while 21 applications are still pending.

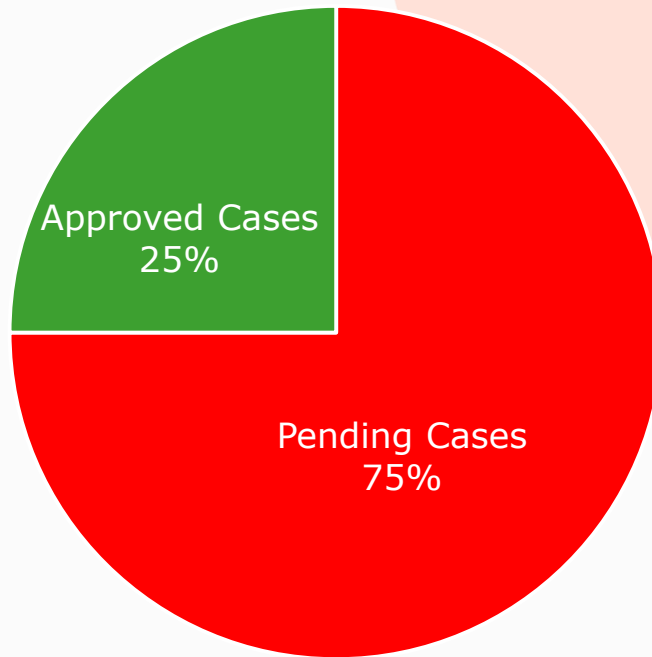

Figure 3: Gender of Applicants

28 applications were received; 11 (39%) applicants were females and 17 (61%) were males.

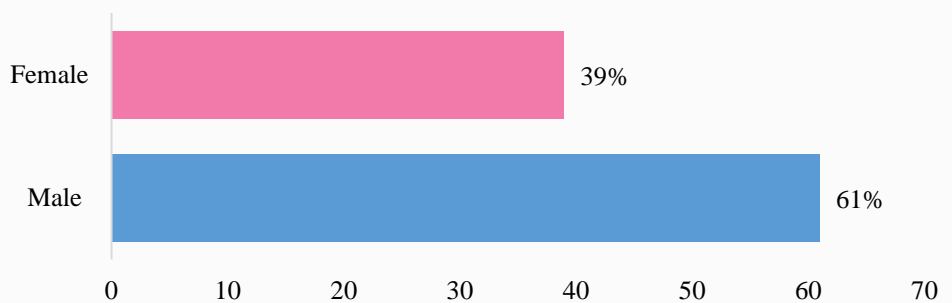

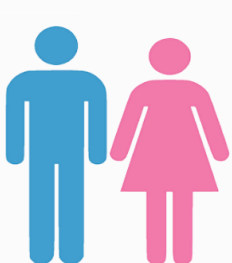

Figure 4: Age of Applicants

According to the applications received, the age range of most applicants- 57% were between 20 – 50 years old, while 18.0% of the applicants were above 50 years, another 18.0% was below 13 years, and 7.0% of the applicants were between 13 – 19 years.

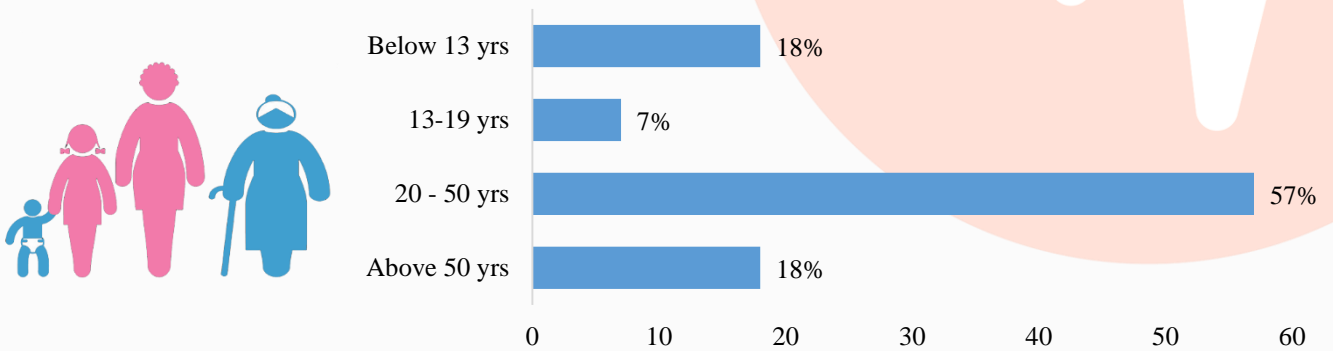

Figure 5: Ailments of Applicants

According to the applications received, most applications – 7 (22.0%) recorded cancer as the highest occurring ailment, 5 (20.0%) applications were accident victims, while 4 (14.0%) of the applications recorded cases on heart diseases, renal diseases and neurological disorder respectively. And 4 (14.0%) applications recorded other forms of medical needs like child birth delivery, fibroid etc.

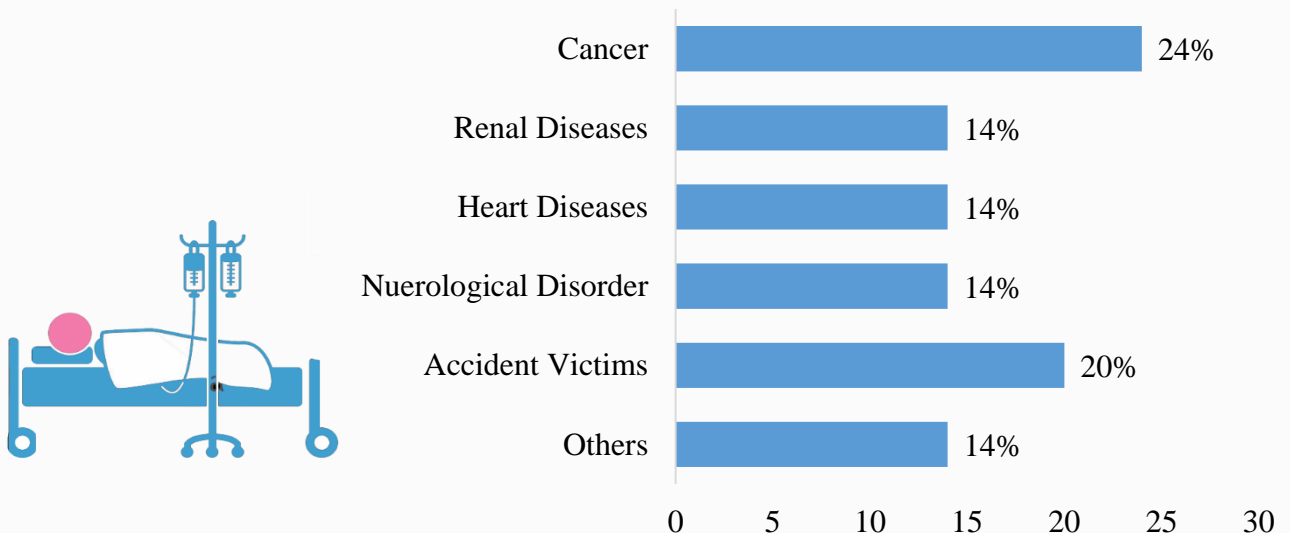

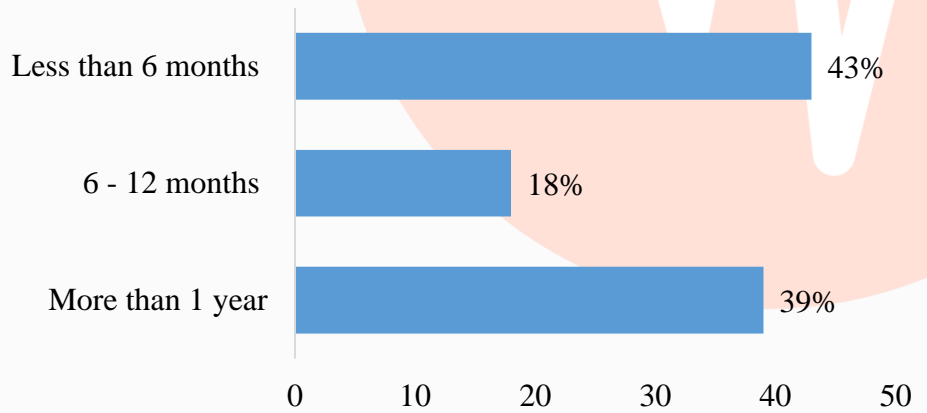

Figure 6: Duration of Ailments

From the applications received, the duration of most applicants ailments has been less than 6 months, while 11 (39.0%) applicants have been sick for more than 1 year, and 5 (18.0%) applicants have been sick for a period between 6 – 12 months.

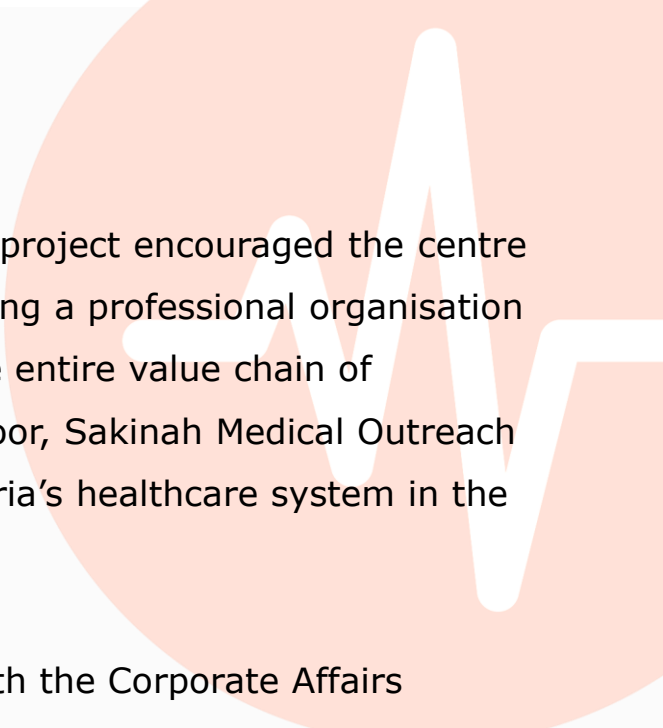

5. About Sakinah Medical Outreach

The Muslim Public Affairs Centre (MPAC) launched the Sakinah Project in 2009 to provide world-class care treatment and medical assistance for indigent and needy members of the society. It has provided a chance for Muslims to have a personal impact on others- Muslim and non-Muslim Nigerians. During the period that MPAC ran the Sakinah as a project, more than N70 million was collected as Sadakat and Zakat and judiciously expended to benefit 2213 persons and organise 4 medical outreaches that have benefited hundred of the less privileged members of the community of its reach. Some of the beneficiaries got free life-changing all-expense paid treatments outside the country, in such countries as India, Turkey, and Germany for chronic ailments.

The project was managed by volunteer Muslim medical practitioners at leading medical centres and teaching hospitals in Nigeria and transformed into full-fledged medical outreach organisation in 2017, set up to deliver high-performance results to both beneficiaries and donors. Funds are dedicated to serving humanity and afford an opportunity for public-spirited individuals to make a difference in the lives of sick people and have a personal impact on them. The intervention project has covered several medical treatments for both the young and aged including evacuation to medical facilities overseas.

The amazing work and successes of the project encouraged the centre to chart a better future for it. By becoming a professional organisation that will deliver top-rated services in the entire value chain of healthcare and service delivery to the poor, Sakinah Medical Outreach is set to play a much bigger role in Nigeria's healthcare system in the coming years.

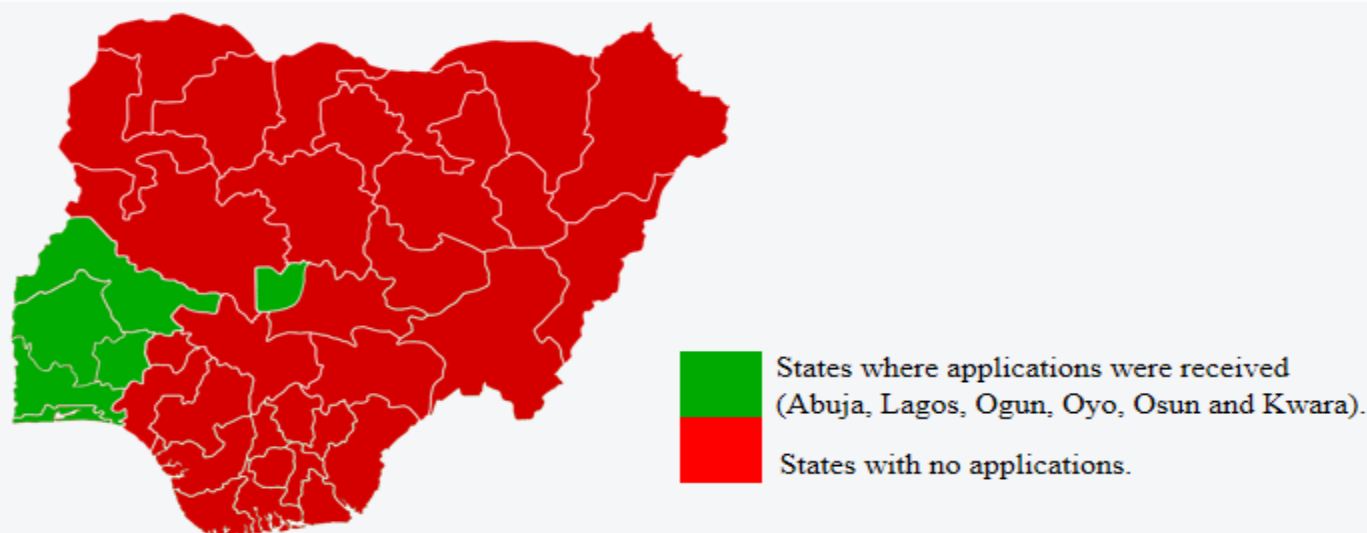

The organisation is fully incorporated with the Corporate Affairs Commission (RC. 102734), with its staff and led by Dr. Salman Yusuf, Consultant Neurosurgeon at the National Hospital Abuja. Dr. Salman has led the Sakinah Project for more than 6 years and midwifed its transition. The organisation will continue to serve the general community with Transparency, Credibility, and Local-Knowledge.

Sakinah Medical Outreach is entirely dedicated to serving humanity. It will provide HOPE, LOVE & PEACE for the sick and their families. Insha Allah, it will put smiles on the faces of the sick and their families. At Sakinah Medical Outreach, we look forward to successful years ahead with accomplishments that will position the organisation as a leading medical outreach organisation in quality service delivery and impacts.
